PROFESSIONAL SUMMARY

Final-year B.Tech IT student (Anna University, 2026) who built and deployed 3 full-stack MERN applications featuring AI integrations (Groq/Llama 3.1), real-time Socket.IO communication, and scalable REST APIs. Seeking Software Developer, Full Stack Developer, and SDE opportunities.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux / Context API, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Spring Boot, REST APIs, Socket.IO, JWT Authentication

Database: MongoDB, MySQL, SQL

AI / Other: Groq API (Llama 3.1), Semantic Search, File Processing (PDF/TXT/MD)

DevOps: Docker, Vercel, Render, Git & GitHub, Postman, VS Code

Languages: Java, JavaScript

PROJECTS

NotesMind — AI Notes Platform

Nov 2025 – Jan 2026

React.js · Node.js · MongoDB · Groq API · Docker · JWT

[sanjay652005-notes-sharing.vercel.app](#)

- Built a full-stack AI notes platform with file upload (PDF/TXT/MD), Groq-powered summarisation, quiz generation, auto-tagging, contextual chat, semantic search, bookmarking, and public sharing; enforced daily rate limits via server-side middleware.
- Dockerised with input validation, unit tests, and mobile-responsive UI; deployed on Vercel + Render with MongoDB Atlas.

SkillSwap — AI Peer-to-Peer Skill Exchange Platform

Jan 2026 – May 2026

React.js · Node.js · MongoDB · Socket.IO · JWT · Groq API (Llama 3.1)

[skillswap-six-pi.vercel.app](#)

- Architected a full-stack MERN app with 15+ REST endpoints covering skill listings, user profiles, and match requests; optimised API response latency to under 200 ms through efficient query design and middleware structuring.
- Integrated Socket.IO for real-time bi-directional messaging; embedded Groq API (Llama 3.1) for personalised skill-match recommendations; secured all endpoints with JWT role-based access control.

QuizArena — Real-Time Multiplayer Quiz Platform

Apr 2026 – May 2026

React.js · Node.js · MongoDB · Socket.IO

[quizarena-liard.vercel.app](#)

- Engineered a room-based multiplayer quiz platform with isolated Socket.IO event namespaces for synchronised question delivery, score tracking, and live leaderboard updates across all connected clients.
- Implemented score normalisation logic and end-of-round state broadcasts; configured CORS policies and environment-based API URLs for seamless Vercel + Render deployment.

EXPERIENCE

Java Full Stack Developer Intern — Besant Technologies, Chennai

Jan 2026 – Apr 2026

- Built 3+ end-to-end CRUD applications using Spring Boot REST APIs, Hibernate/JPA, and MySQL, following MVC architecture with layered service design.
- Developed React.js frontends integrated with Spring Boot backends; managed codebase with Git version control and GitHub pull request workflows.

Full Stack Development Training — NoviTech R&D; Pvt. Ltd., Coimbatore

June 2024 – Aug 2024

- Built MERN stack applications with RESTful API design, MongoDB schema modelling, and JWT-based authentication; completed 30-day intensive programme at NoviTech R&D; Pvt. Ltd.

Web Development Intern — Pinnacle Lab (Virtual)

July 2024 – Aug 2024

- Built 3 responsive projects (weather app, to-do list, quiz app) integrating third-party REST APIs; strengthened async JS, DOM manipulation, and error-handling skills.

EDUCATION

B.Tech, Information Technology — Arulmigu Meenakshi Amman College of Engineering (Anna University)

Sept 2022 – May 2026

CGPA: 7.6

CERTIFICATIONS

- IBM Full Stack Software Developer** — Coursera (Jul 2025): React, Node.js, Django, Kubernetes, CI/CD · 10 courses.
- Deloitte Data Analytics Job Simulation** — Forage: Data analysis, Excel modelling, and business insights reporting.
- TCS GenAI Job Simulation** — Forage: Generative AI concepts, prompt engineering, and real-world GenAI application workflows.
- NoviTech R&D Pvt. Ltd.** — Full Stack Development Programme Completion Certificate (Aug 2024).

ACHIEVEMENTS

- Solved 100+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks to strengthen core problem-solving skills.
- Completed a self-driven #100DaysOfCode challenge, building and documenting daily progress across DSA problems, frontend components, and backend modules publicly on GitHub.
